D120

Smoke curtain D120

The D120 smoke curtain is tested at 600 degrees and certified according to EN 12101-1.

The smoke curtains are used to control the spread of smoke during a fire to create better escape conditions in the building.

The curtain is prepared for external ABA/ABDL signals so that it automatically lowers in the event of a fire. The D120 is made of premium fabric and meets the highest standards.

The inlet box and guide rails can be painted in RAL colours upon request.

D120	SMOKE CURTAIN D120
BENEFITS	• Prevents smoke from spreading between buildings, zones or floors. • Optimises excape conditions. • Reliable design with minimal maintenance. • Lightweight construction that requires a minimum of space. • Available both wall and ceiling mounted.
